

bubble butt  
- composed of  
enough fat to  
squish, but  
still firm.

fat butt  
- much more  
fat  
- prone to  
dimpling  
(cellulite)

muscle butt  
- very little fat  
- firm to touch

some types:

obviously, there are others,  
these are just the more common in nsfw

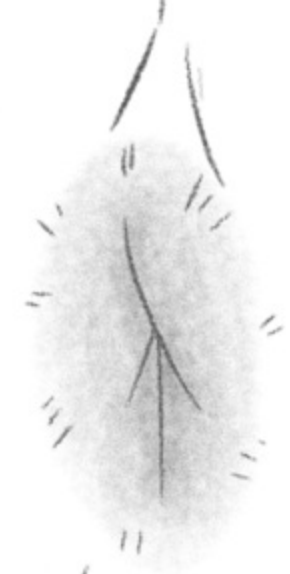

BUTTS: AN OVERVIEW II

# BUTTS: AN OVERVIEW V

(anuses & gape)

buttocks

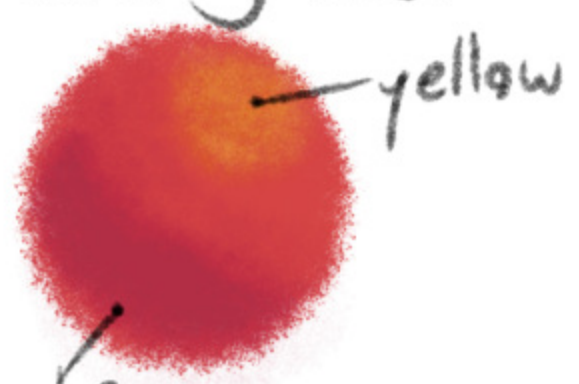

anus can be pink, red, brown

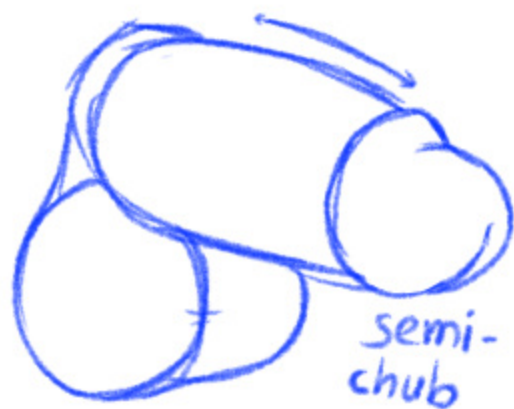

like a lumpy tunnel

shading red:

purple

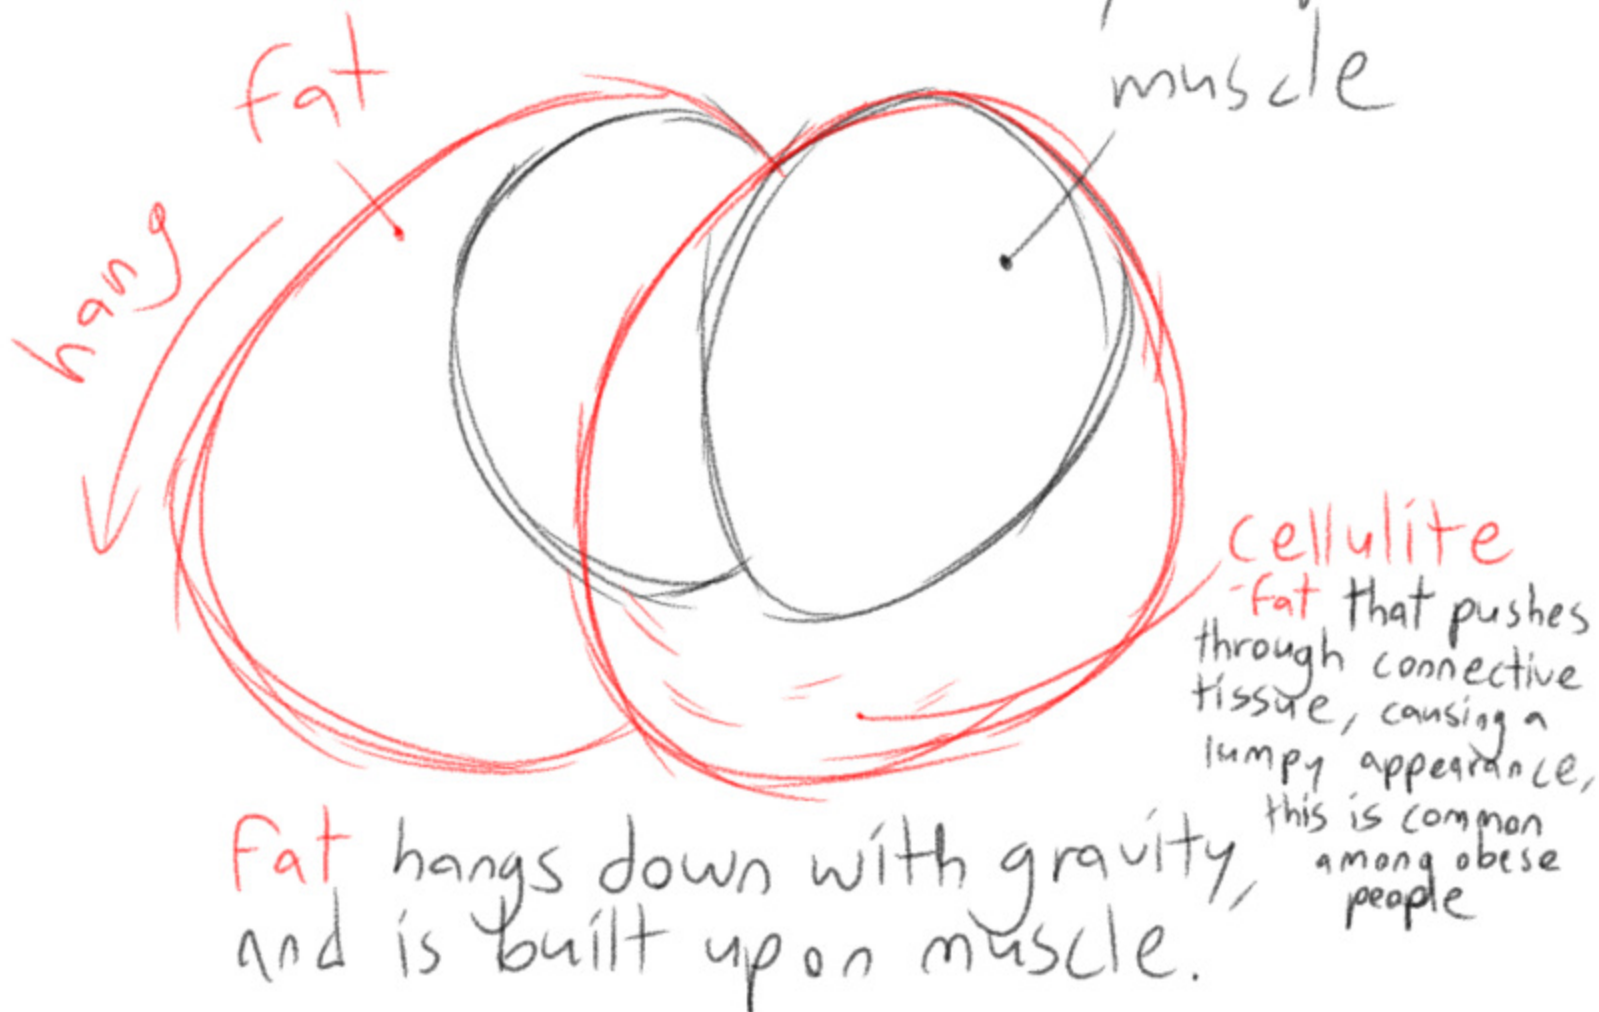

ちんぽときんたま  
のチュートリアル

# BUTTS: AN OVERVIEW

\* the anus & balls are connected by the perineum.

Fat hangs down with gravity, and is built up on muscle.

cellulite  
-fat that pushes through connective tissue, causing a lumpy appearance, this is common among obese people

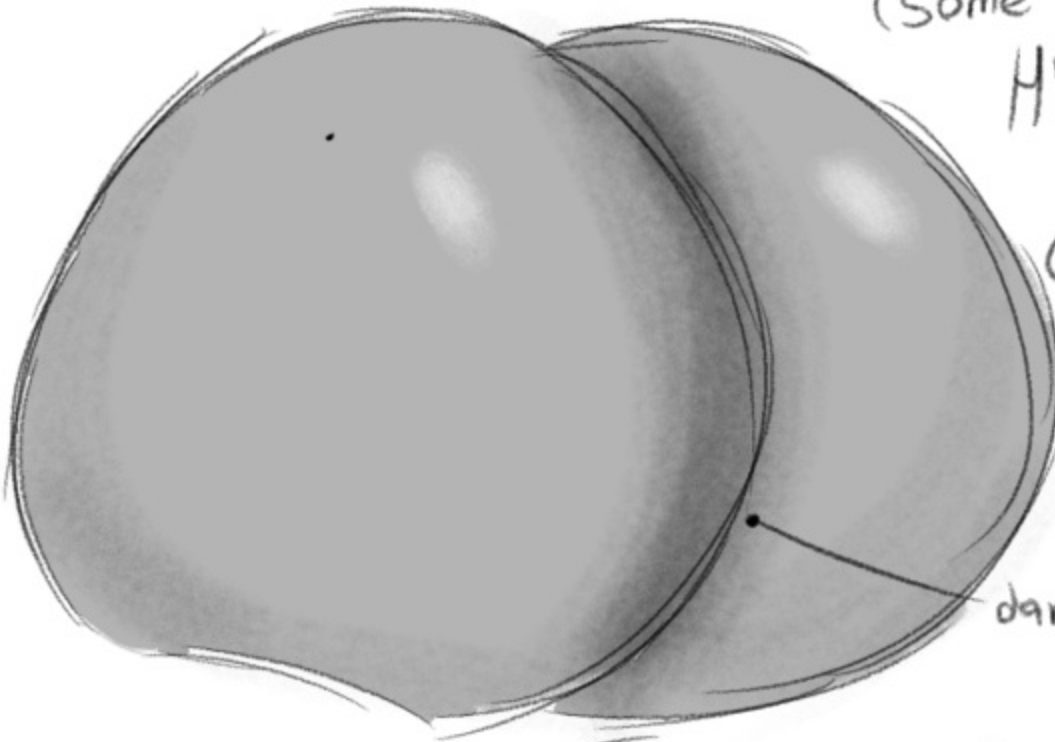

# BUTTS: AN OVERVIEW III

(some skin stuff)

## HYPERPIGMENTATION (intergluteal)

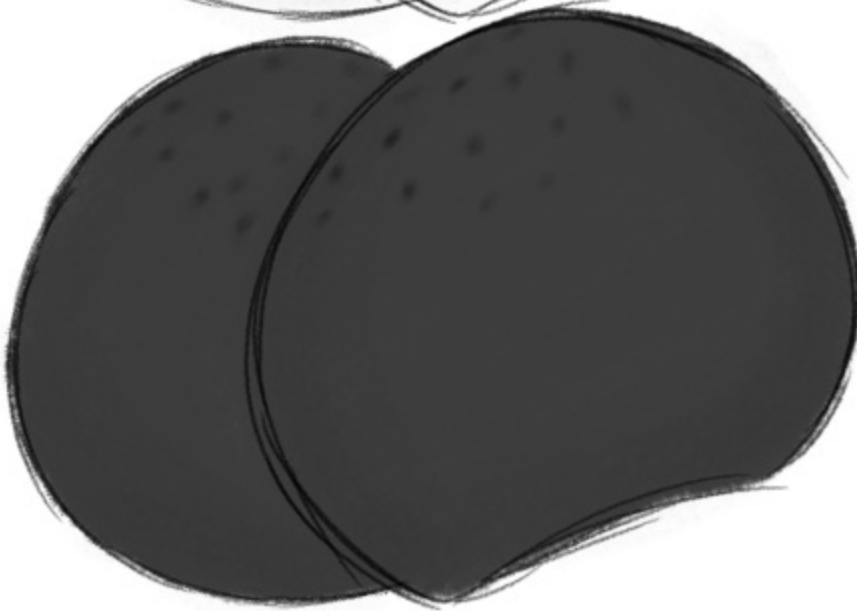

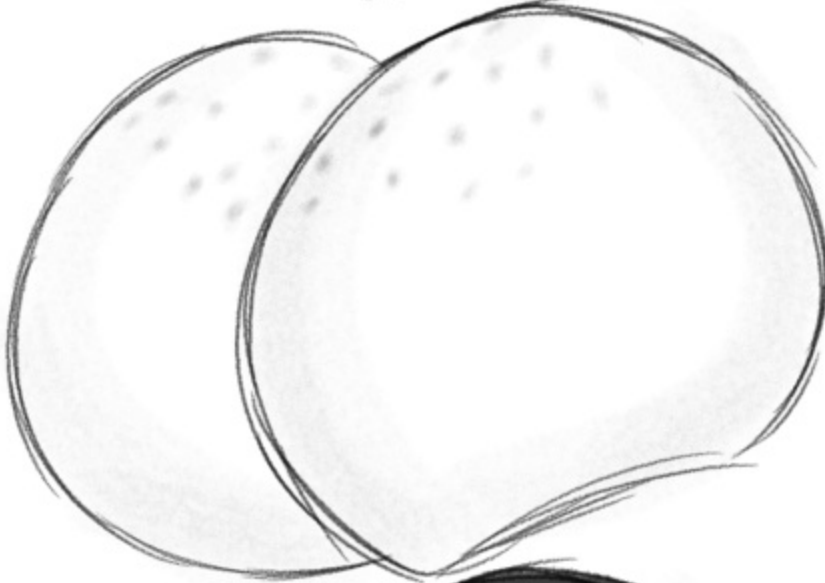

Common among POC who are obese, this is caused by skin trauma from their cheeks rubbing together.

darkening of skin in crack

## FRECKLES:

Freckles are another melanin-related skin phenomenon. Freckles are small concentrated specks of melanin on a body part. People can have freckles regardless of skin tone.

# CHESTS a tutorial

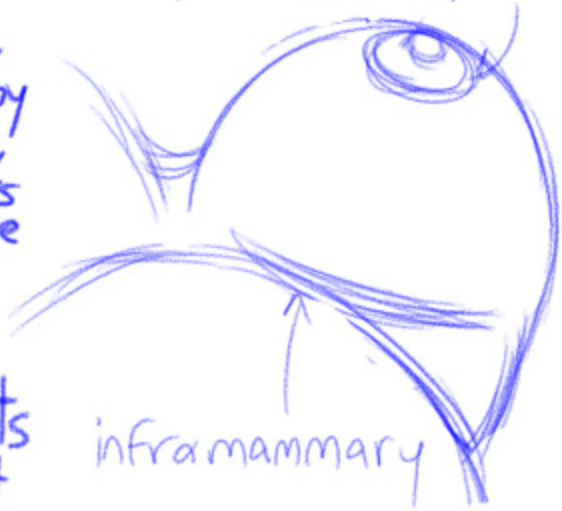

## BREASTS

nipple level  
is peak of  
breast

natural breasts  
are made of fat,  
affected by  
gravity,  
implants  
are more  
firm

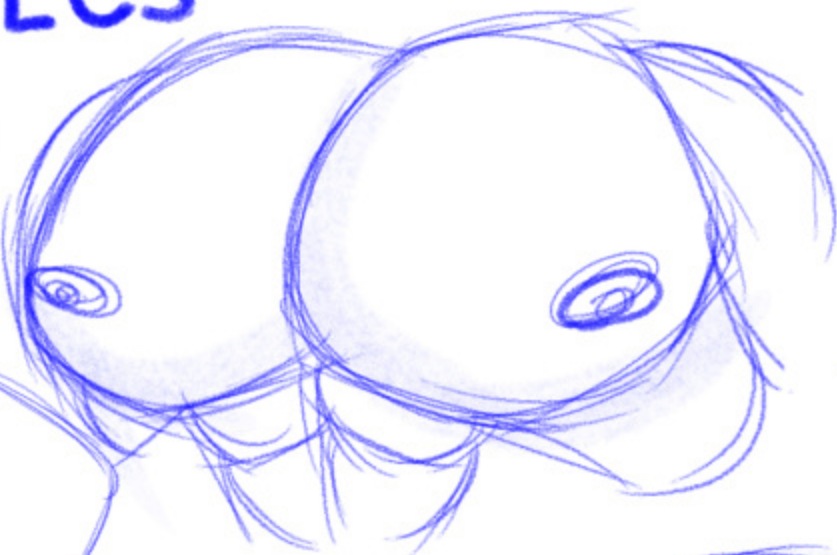

connects  
to armpit

incisions for  
top surgery

## PECS

made  
of muscle  
(firm)

like a  
pentagon

BOOBIES

peri  
areolar

intra  
mammary

scarring

1. T-anchor
2. peri
3. infra

# BUTTS: AN OVERVIEW IV

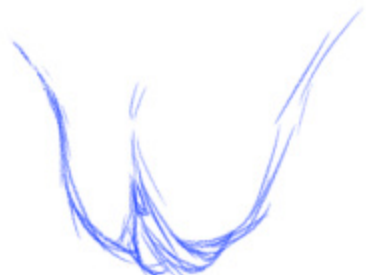

(tails)

the tail is a  
continuation  
of the spine,  
not a vestigial  
structure

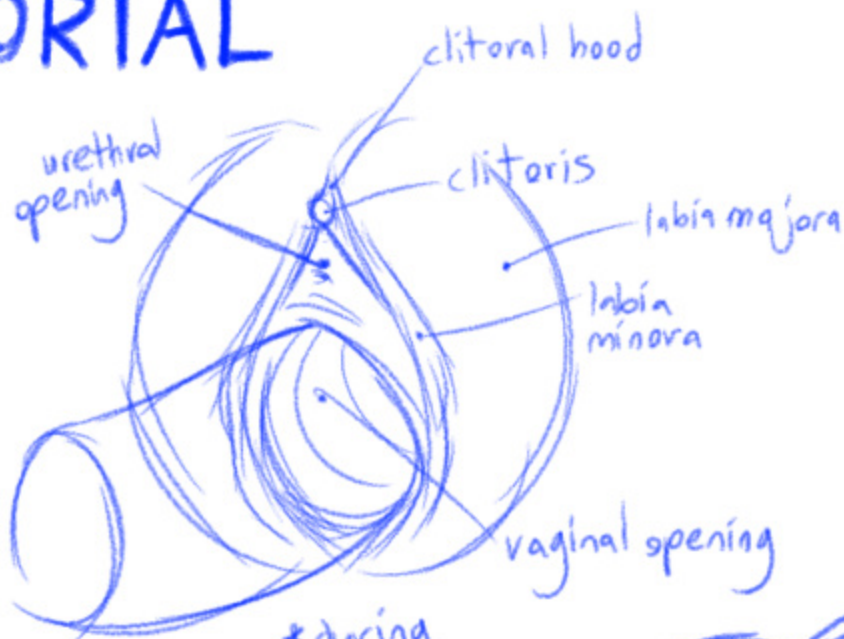

the tail  
is directly  
above the  
anus.

# VAGINA TUTORIAL (humanoid)

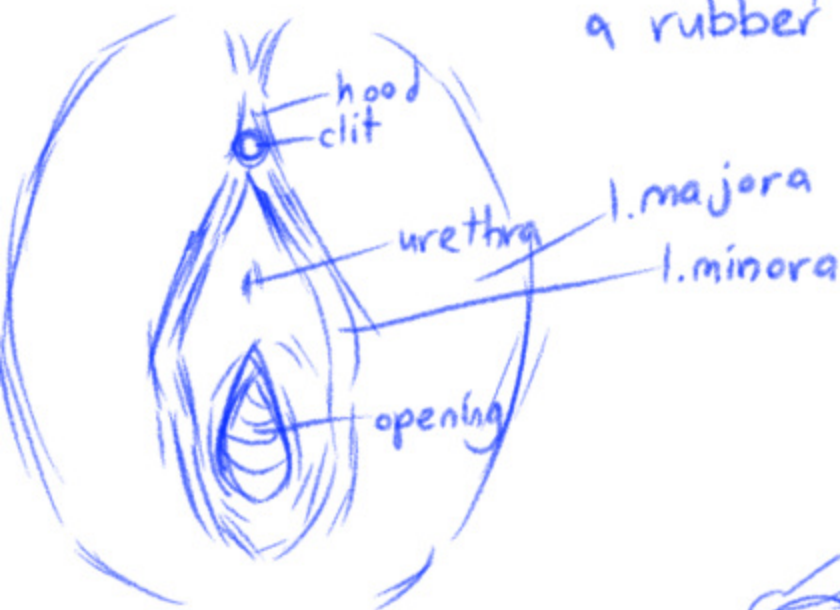

some vaginas  
inner labia show  
from the front,  
some don't.

\*during  
penetration

vaginas do not  
stretch out after  
sex, they are like  
a rubber band.

this tutorial only  
covers humanoid  
vaginas, animalistic  
ones are very different  
and tutorials are  
elsewhere
