

bubble butt
- composed of
enough fat to
squish, but
still firm.

fat butt
- much more
fat
- prone to
dimpling
(cellulite)

muscle butt
- very little fat
- firm to touch

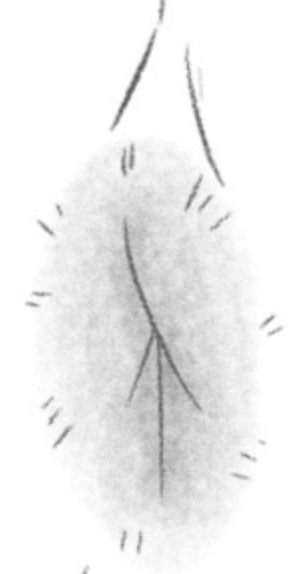

some types:

obviously, there are others,
these are just the more common in nsfw

BUTTS: AN OVERVIEW II

BUTTS: AN OVERVIEW V

(anuses & gape)

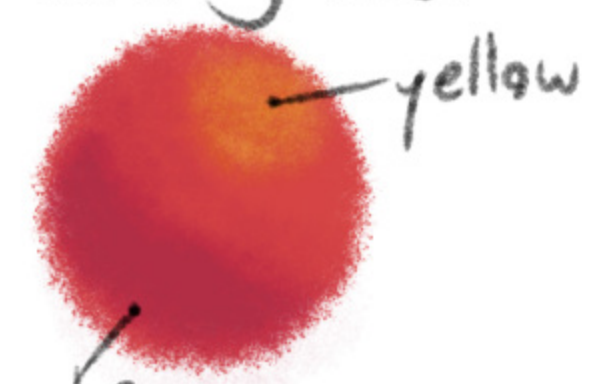

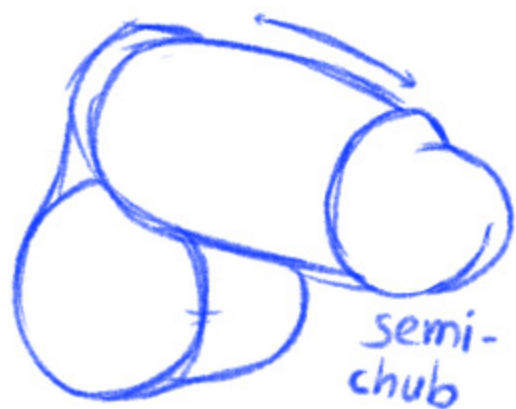

anus can be pink, red, brown

like a lumpy tunnel

shading red:

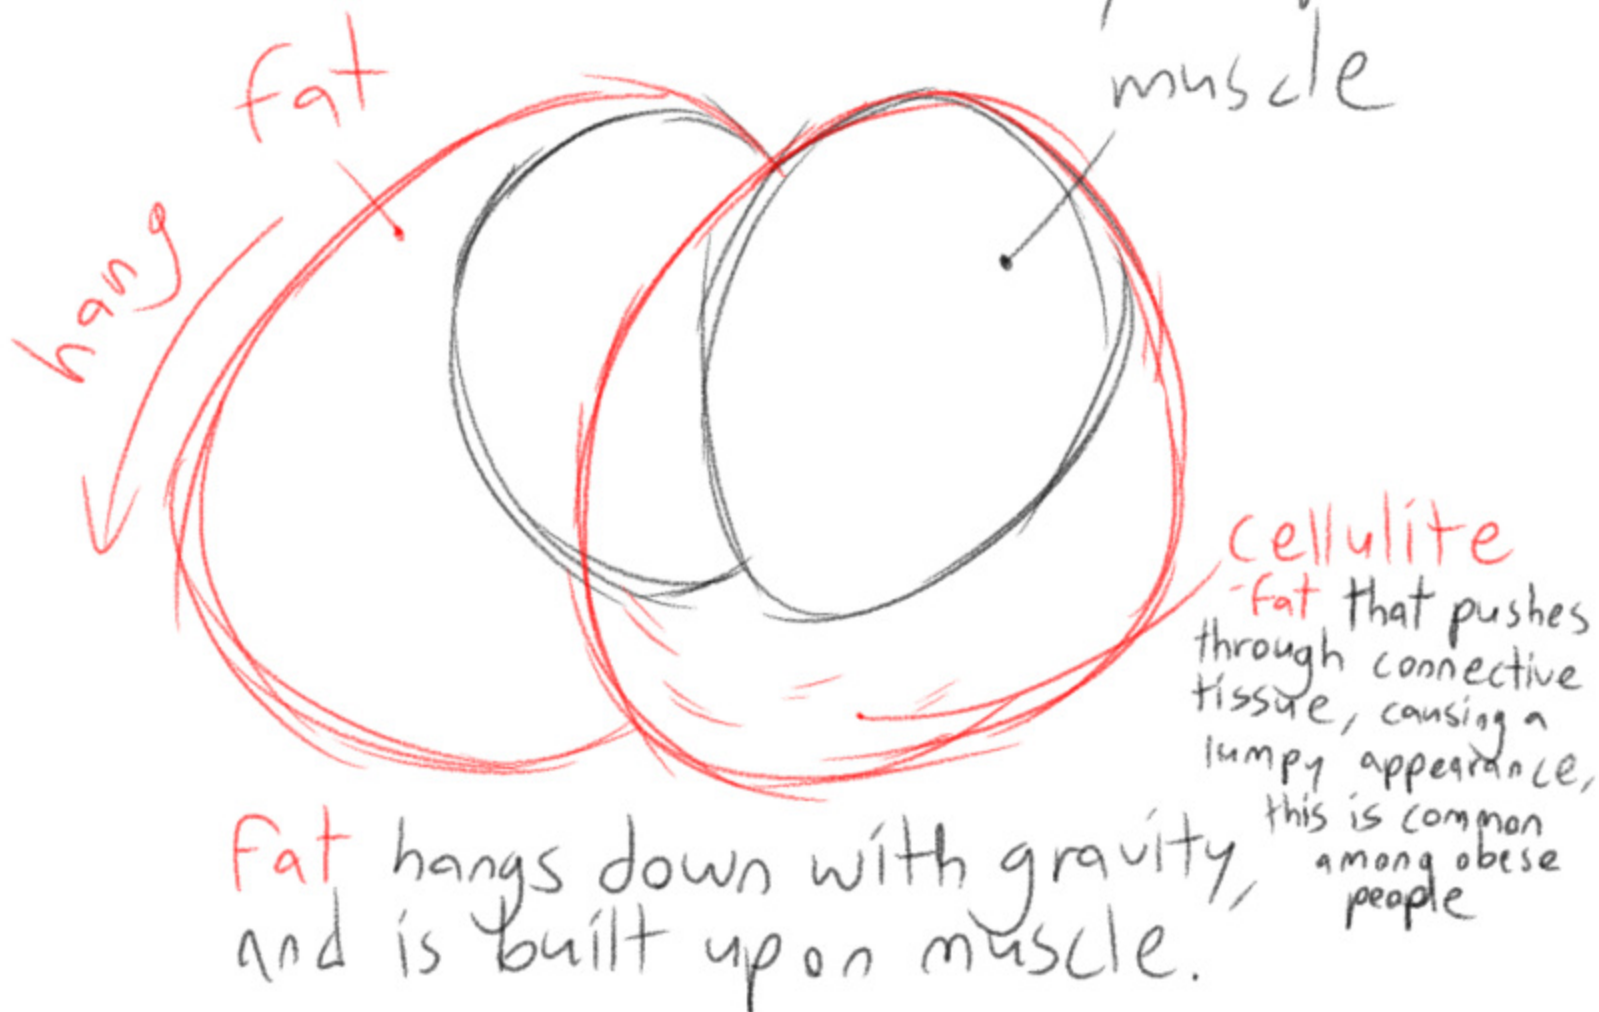

ちんぽときんたま
のチュートリアル

BUTTS: AN OVERVIEW

* the anus & balls are connected by the perineum.

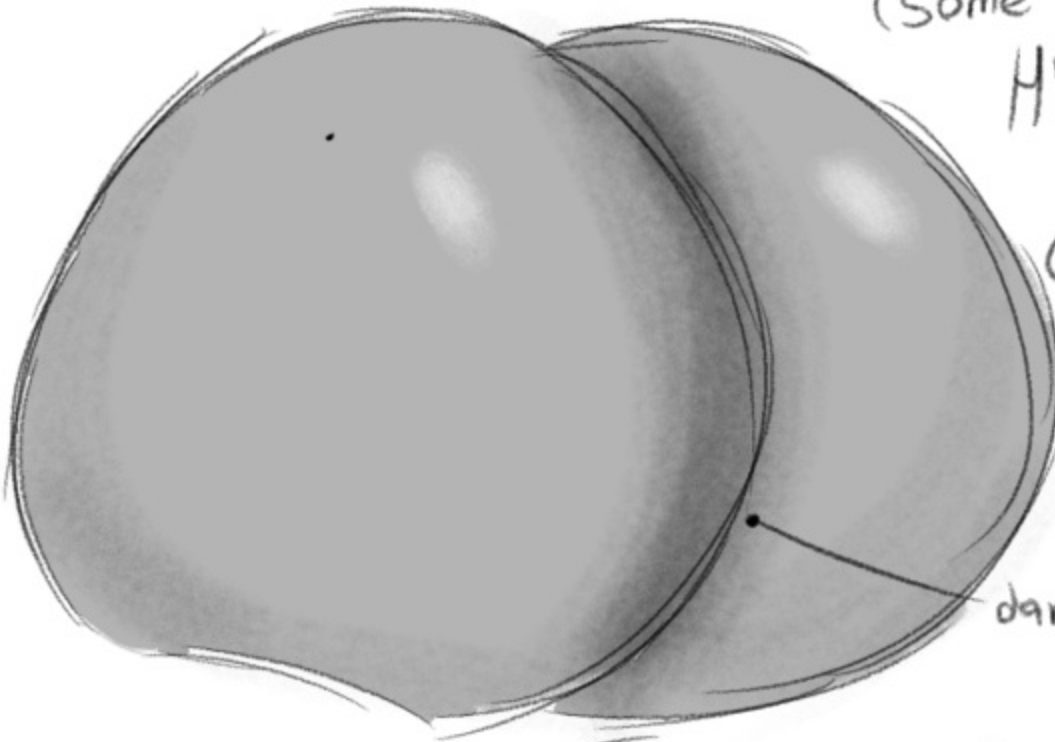

BUTTS: AN OVERVIEW III

(some skin stuff)

HYPERPIGMENTATION (intergluteal)

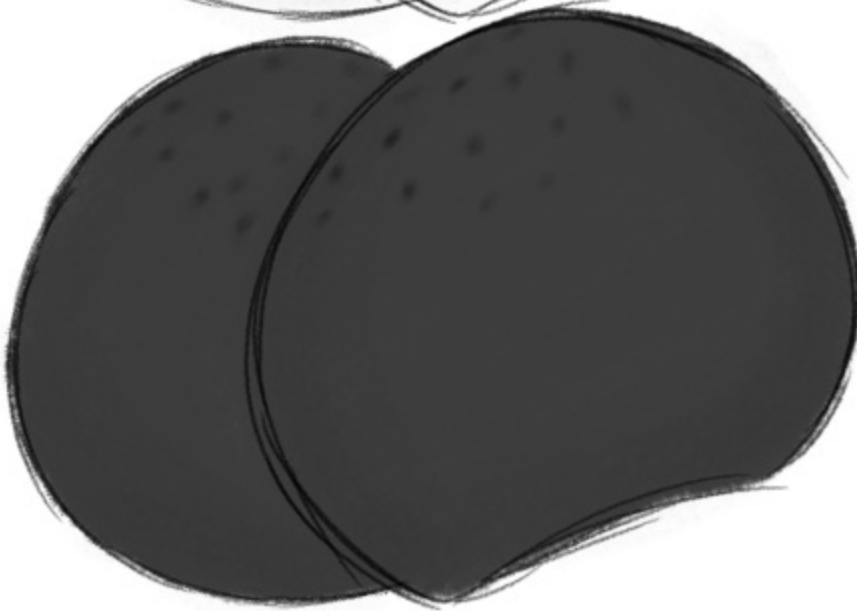

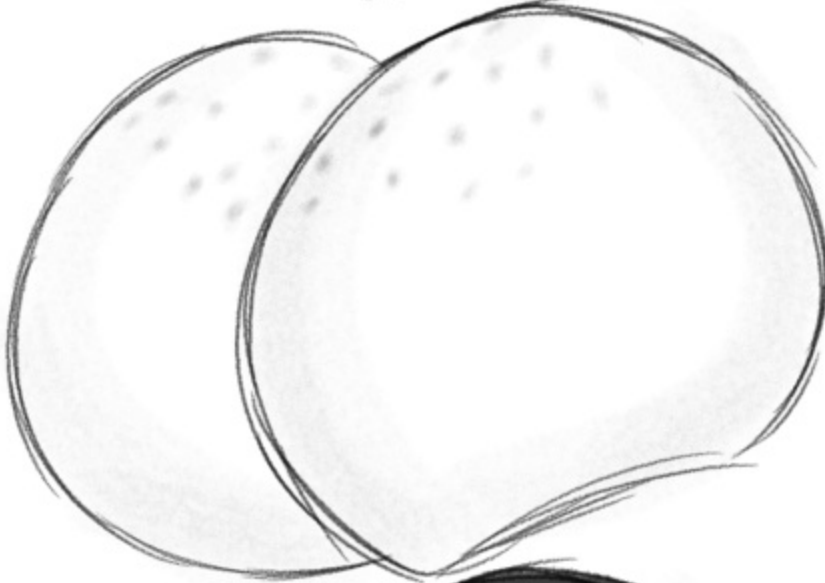

Common among POC who are obese, this is caused by skin trauma from their cheeks rubbing together.

darkening of skin in crack

FRECKLES:

Freckles are another melanin-related skin phenomenon. Freckles are small concentrated specks of melanin on a body part. People can have freckles regardless of skin tone.

CHESTS a tutorial

BREASTS

nipple level
is peak of
breast

natural breasts
are made of fat,
affected by
gravity,
implants
are more
firm

connects
to armpit

incisions for
top surgery

periareolar

inframammary

PECS

made
of muscle
(firm)

peri
areolar

intra
mammary

like a
pentagon

BOOBIES

scarring

1.  + anchor

2.  peri

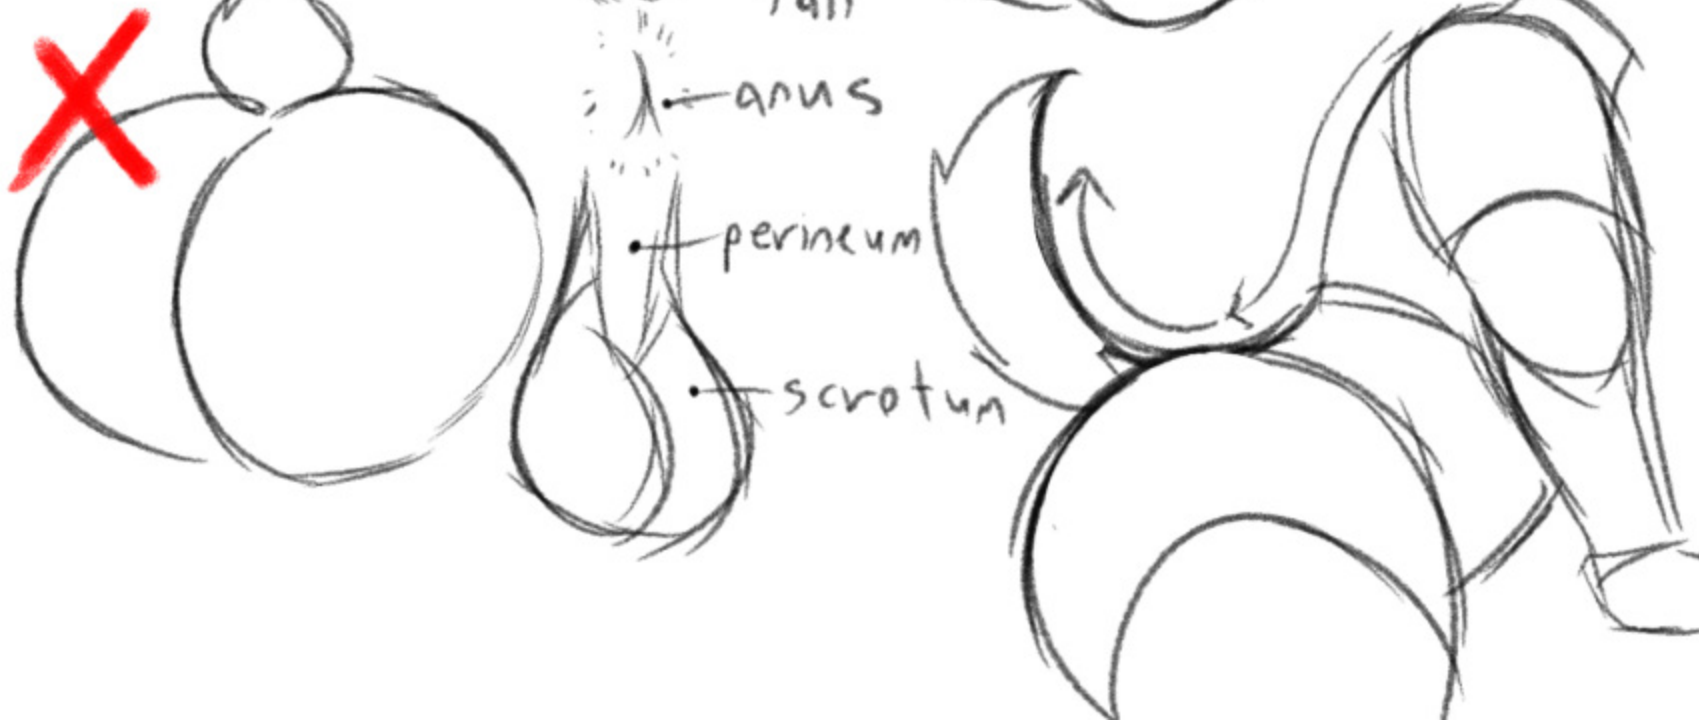

3.  infra

BUTTS: AN OVERVIEW IV

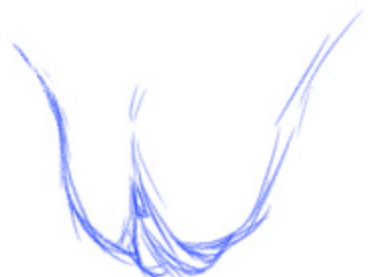

(tails)

the tail is a
continuation
of the spine,
not a vestigial
structure

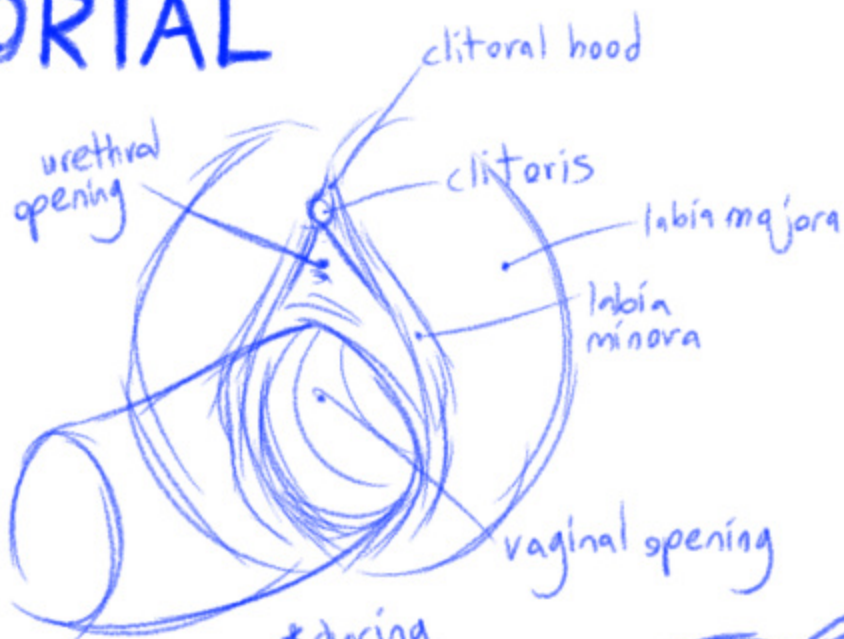

the tail
is directly
above the
anus.

VAGINA TUTORIAL (humanoid)

some vaginas
inner labia show
from the front,
some don't.

*during
penetration

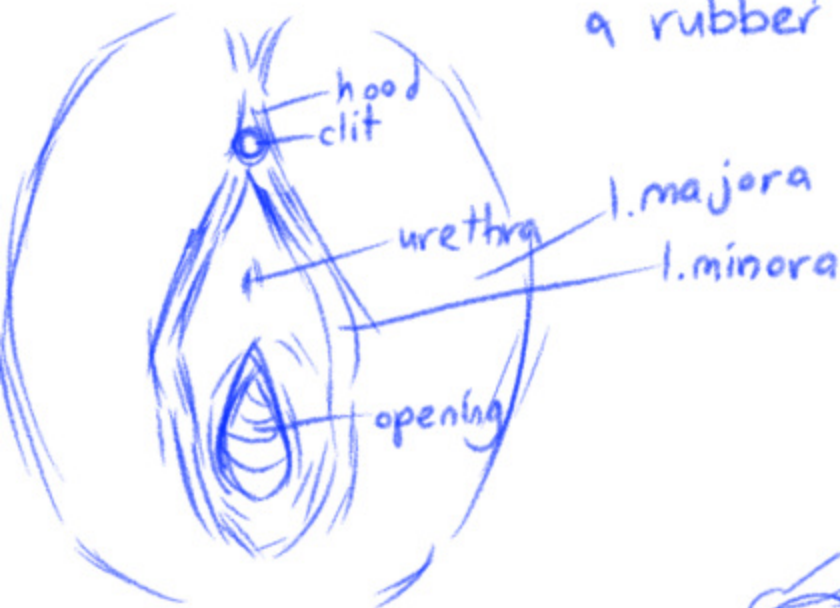

vaginal opening

vaginas do not
stretch out after
sex, they are like
a rubber band.

Vagina is
upside down
in this position

this tutorial only
covers humanoid
vaginas, animalistic
ones are very different
and tutorials are
elsewhere

peace
