## CLITORAL HOOD

Piece of skin above the clit- it ranges from barely there to completely covering the clit. Everyone's different!

## CLITORIS

Nub of flesh that rests at the top of the vagina. Abundance of fantastic nerve endings! Fun boob button.

## OUTER LABIA/LIPS

Larger bits of skin and fat that keep the bits inside safe and covered.

## INNER LABIA/LIPS

Inner flaps of skin that range in size and thickeness. Some are large or long and poke out of the outer lips, some are small and hardly seen.

## VAGINAL OPENING

FUN ZONE. As with everything- no one is the same, might be larger might be smaller.

## URETHRAL OPENING

Pee zone.

ARTIST'S CHOICE!

@XXXENOKUN

EVERYONE IS DIFFERENT! It's just about knowing the basics and then mixing and matching from there! Mixing clit A with lips B and maybe only showing like C. Try small covered clit with puffy lips or tiny lips with a chunky clit-etc!
